

Second US-China Green Energy Forum

October 22 Evening and October 23, 2009

Crowne Plaza Cabana Hotel & Resorts, Palo Alto, CA, USA

Organized by the US-China Green Energy Council (UCGEC)

Forum Honorary Co-Chairs:

US side: (To be announced)

Chinese side: Han Qide, Vice Chairman of the Standing Committee of National People's Congress of China (NPCC), President of the China Association for Science and Technology (CAST)

UCGEC Honorary Chair:

Mike Honda: U.S. Congressman, Chair of Congressional Asian Pacific American Caucus

Forum Co-Chairs:

Robert Larson: President of UCGEC, Former IEEE President

Robert Wu: Chairman of UCGEC

Xu Dingming, State Council, The National Advisory Committee, National Director of the Energy Advisory Committee of Experts

Confirmed Speakers:

Arun Majumdar: Associate Director of Lawrence Berkeley National Laboratory

Lorie Wigle: General Manager, Eco-Technology, Intel Corporation; President, Climate Savers Computing Initiative

Peter Drekmeier: Mayor of Palo Alto

Shankar Sastry, Dean of College of Engineering, University of California, Berkeley

Steve Westly: CEO, The Westly Group, Former Chief Fiscal Officer of California

Sehat Sutardja: Chairman, President, and CEO, Marvell

Xu Dingming, State Council, The National Advisory Committee, National Director of the Energy Advisory Committee of Experts

Yang Shen: Former Deputy Minister of Construction, Honorary President of China Real Estate Association

Forum Sponsors:

Marvell; K&L Gates; Wilson Sonsini Goodrich & Rosati

The United States and China are the world's two largest nations in primary energy consumption, petroleum demand, and greenhouse gas emissions. The US-China Green Energy Forum is designed to explore ways of forming cleantech partnerships and alliances among private parties, non-governmental organizations and public sector organizations in the U.S. and China. The Forum encourages participants to become informed about the challenges facing the development and implementation of green energy technologies. We endeavor to overcome these challenges together by cultivating unique solutions and creating shared benefits.

The first US-China Green Energy Forum was held in November 2008 in Beijing, China. U.S. Senator Dianne Feinstein and Dr. Han Qide, Vice Chairman of the Standing Committee of National People's Congress of China (NPCC), were the Honorary Co-Chairs. Over 100 speakers and 500 professionals from the U.S. and China joined the Forum, including Fortune 500 company executives, seasoned entrepreneurs, government officials, top investors, and renown scholars. The Forum garnered over 1,000 media mentions on the Internet from major Western and Chinese media, including ABC, National Public Radio, China Central Television (CCTV), China Daily, and Sina.com.

The second US-China Green Energy Forum will be held in October 2009 in Silicon Valley, USA. Silicon Valley is the heart of cleantech innovation and California is a leader in the world's migration to sustainability. The focused topics of the Forum include, but are not limited to: Green Building/Eco-city, Transportation/Electric Vehicle, Renewable Energy, Smart Grid, and Cleantech Investment. There will be a mix of plenary speeches, panel discussions, networking activities, and tailored follow-up events. Professionals from the U.S. and China, representing the academic, business and government sectors, will be speaking and attending the event. For more information on the Council and the Forum, please visit <http://ucgef.org/>.

About US-China Green Energy Council

Founded in Silicon Valley in 2008, UCGEC is a leading non-profit organization that connects U.S. and Chinese individuals interested in green energy. The mission of UCGEC is to facilitate and sponsor high impact cleantech collaborative initiatives and projects between the U.S. and China, and to serve as a platform for the integration of policy, business, investment, research, and development projects for the two countries. The UCGEC's members include the Berkeley Chinese Alumni International Association (BCAIA), Lawrence Berkeley National Laboratory, the Bay Area Science Innovation Consortium (BASIC), the University of California Office of the President, the 1990 Institute, San Jose State University, the Huayuan Science and Technology Association, and many others. The Advisory Board consists of cleantech experts from the China Association for Science and Technology, the China High-Tech Industrialization Association, the China Renewable Energy Society, the Chinese Institute of Electronics, Tsinghua University, Shanghai Jiaotong University, Tianjin University and business, research, investment and policy leaders from the U.S. and China.

Crowne Plaza Cabana Hotel & Resorts is one of the premiere green-certified hotels in Silicon Valley. The City of Palo Alto ranks as No. 1 in the U.S. renewable energy program.
